PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1a.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

25X1D

Penza Army Barracks is located 1.5 kilometers (km) west of Penza Railroad Yards South [REDACTED] and 0.5 km south of a large race track on the western outskirts of Penza (Figure 1).

The installation covers approximately 230 acres and consists of 2 barracks/administration areas, a motor pool, and a general storage area (Figures 2 and 3).

Penza Artillery OCS [REDACTED] is reportedly contained within this installation;

however, no training facilities could be identified and nothing in the area indicates the presence of an OCS.

[REDACTED] KEYHOLE missions between [REDACTED] [REDACTED] were reviewed. None was of sufficient quality to reveal the exact function of the installation. It appears, however, to be devoted entirely to material storage and associated support elements. Comparison of these missions revealed no significant change.
